Siaran Media

Wartawan Muda Diingatkan Tidak Bergantung Sepenuhnya Kepada AI

SHAH ALAM, 13 Mei — Kecerdasan buatan (AI) mungkin sedang mengubah operasi bilik berita serta mempercepatkan proses penyelidikan dan penghasilan kandungan, namun kewartawanan penyiasatan perlu terus dipandu oleh pertimbangan manusia, etika dan laporan lapangan, kata pengamal media semasa 53rd Journalism e-Colloquium yang berlangsung secara dalam talian hari ini.

Perkembangan teknologi AI dan implikasinya terhadap masa depan kewartawanan penyiasatan menjadi fokus utama dalam 53rd Journalism e-Colloquium anjuran pelajar tahun akhir Program Kewartawanan, Fakulti Komunikasi dan Pengajian Media (FKPM), Universiti Teknologi MARA (UiTM) Shah Alam yang berlangsung secara dalam talian hari ini.

Program bertemakan “AI & Investigative Journalism: Risks & Opportunities” itu berjaya menarik lebih 1,000 tontonan menerusi siaran langsung di platform YouTube Journalism Colloquium.

Kolokium dwitahunan tersebut kali ini telah membawa pengamal media dan wartawan penyiasatan dari Malaysia dan Indonesia bagi membincangkan cabaran, peluang serta implikasi penggunaan AI dalam industri kewartawanan masa kini.

Antara panel yang terlibat ialah wartawan penyiasatan Malaysiakini, S. Vinothaa; Timbalan Pengarang Urusan Kumpulan Media Prima Berhad merangkap Profesor Adjung FKPM UiTM, Farrah Naz Karim; dan Ketua Koresponden Antarabangsa CNN Indonesia, Rully Kurniawan. Sesi forum dikendalikan oleh wartawan The Malaysian Reserve (TMR), Shahrin Aizat.

Sepanjang sesi berlangsung, panel menegaskan bahawa AI perlu dilihat sebagai alat sokongan dalam proses kewartawanan dan bukannya pengganti kepada wartawan manusia.

Menurut Rully Kurniawan, teknologi tersebut mampu membantu meningkatkan kecekapan kerja khususnya dalam proses penyelidikan dan analisis data, namun keputusan editorial dan pengesahan fakta masih memerlukan campur tangan manusia.

“AI boleh membantu mempercepatkan proses penyelidikan dan analisis data, tetapi wartawan tetap perlu turun ke lapangan untuk melakukan pengesahan. AI hanya memberi petunjuk, bukan menentukan kesimpulan sesuatu laporan,” katanya.

Farrah Naz Karim pula berkata bilik berita masa kini semakin memanfaatkan AI bagi meningkatkan kecekapan penghasilan kandungan pelbagai platform.

Bagaimanapun, beliau menegaskan bahawa wartawan tidak boleh terlalu bergantung kepada teknologi sehingga mengabaikan asas kewartawanan seperti semakan fakta dan keberanian mengemukakan soalan kritikal.

“Kita tidak boleh biarkan AI menulis keseluruhan cerita penyiasatan. Wartawan perlu kembali kepada asas iaitu bertanya soalan sukar, turun ke lapangan dan menghasilkan cerita yang mempunyai nilai kemanusiaan serta jiwa,” katanya.

Sementara itu, S. Vinothaa menekankan bahawa kewartawanan penyiasatan masih memerlukan naluri manusia, pemerhatian di lapangan dan kemampuan memahami realiti masyarakat yang tidak mampu digantikan oleh AI.

Beliau berkata wartawan perlu turun ke lokasi sebenar kerana banyak maklumat penting tidak dipaparkan secara dalam talian.

“AI memang membantu dalam proses penyelidikan dan analisis data, tetapi ia tidak boleh membaca emosi manusia, memahami bahasa tubuh atau membina kepercayaan dengan sumber. Itu kekuatan wartawan yang sebenar,” katanya.

Pengarah Projek, Nik Nur Iman Wahyu berkata penganjuran kolokium tersebut berjaya membuka ruang perbincangan kritikal berkaitan masa depan kewartawanan digital serta memberi pendedahan kepada mahasiswa mengenai realiti sebenar industri media masa kini.

“Penganjuran kolokium ini telah membuka ruang perbincangan kritikal mengenai masa depan kewartawanan digital dan realiti sebenar industri media kepada bakal graduan kewartawanan,” katanya.

Beliau turut berkata platform dalam talian membolehkan program tersebut diakses secara lebih meluas oleh masyarakat umum serta pelajar bidang media dan kewartawanan dari pelbagai institusi dalam dan luar negara.

“Penganjuran secara dalam talian memberi peluang kepada orang ramai, khususnya pelajar media dan kewartawanan, untuk mengikuti perbincangan ini dengan lebih mudah tanpa batasan lokasi,” katanya.

Selain membincangkan penggunaan AI dalam bilik berita, forum tersebut turut menyentuh isu deepfake, kandungan sintetik, keselamatan data serta keperluan mewujudkan garis panduan etika penggunaan AI dalam industri media.

LEMBARAN FAKTA

Journalism e-Colloquium

Journalism e-colloquium merupakan Projek Tahun Akhir yang dianjurkan oleh pelajar tahun akhir Program Sarjana Muda Komunikasi Massa (Kepujian) Kewartawanan, Fakulti Komunikasi dan Pengajian Media (FKPM), UiTM Shah Alam. Platform ini menunjukkan komitmen berterusan universiti dalam memperkukuh pendidikan kewartawanan dengan memberi penekanan kepada pendedahan realiti industri media masa kini.

Edisi kali ini memfokuskan kepada evolusi kewartawanan penyiasatan di Malaysia, kolokium ini mengupas bagaimana AI dan pelaporan imersif dapat mentakrifkan semula akauntabiliti media serta aspek keselamatan wartawan dalam berdepan dengan cabaran zaman digital.

Objektif Utama

- Menganalisis Impak AI: Menilai risiko dan peluang AI dalam konteks pelaporan penyiasatan serta integriti etika media.
- Meningkatkan Kompetensi Profesional: Memperkukuh pemahaman pelajar terhadap cabaran industri melalui interaksi langsung bersama pengamal media yang berpengalaman.
- Merangkaikan Akademia dan Industri: Menyediakan platform bagi pelajar UiTM, mahasiswa universiti tempatan, dan orang awam untuk berinteraksi bersama pengamal media antarabangsa dan tempatan.
- Memupuk Perspektif Global: Memudahkan cara pertukaran idea merentas sempadan mengenai masa depan akauntabiliti dan teknik penceritaan imersif.

Moderator: Shahrin Aizat, Journalist, The Malaysian Reserve (TMR)

Panelists:

1. Farrah Naz Karim, Timbalan Pengarang Urusan Kumpulan Media Prima Berhad merangkap Profesor Adjung FKPM UiTM, Media Prima Berhad
2. Rully Kurniawan, Ketua Koresponden Antarabangsa, CNN Indonesia
3. S. Vinothaa, wartawan penyiasatan Malaysiakini

Kolaborasi & Sokongan Industri

UiTM Rembau & UiTM Alor Gajah: Melalui penglibatan aktif pelajar Fakulti Komunikasi dan Pengajian Media bagi memupuk kolaborasi akademik antara kampus.

Budi Luhur TV: Sebagai rakan media yang menyokong promosi inisiatif akademik dan memperkukuh sinergi antara universiti dan pemain industri.

PRESS RELEASE COLLOQUIUM

Media Release

Young Journalists Reminded Not to Depend Entirely on AI

SHAH ALAM, May 13 — Artificial intelligence (AI) may be transforming newsroom operations and accelerating research and content production, but investigative journalism must continue to be driven by human judgement, ethics and field reporting, media practitioners said during the 53rd Journalism e-Colloquium held online today.

The development of AI technology and its implications for the future of investigative journalism became the main focus of the 53rd Journalism e-Colloquium organised by final-year students of the Journalism Programme, Faculty of Communication and Media Studies (FCMS), Universiti Teknologi MARA (UiTM) Shah Alam, which was held online today.

The programme, themed “AI & Investigative Journalism: Risks & Opportunities,” successfully attracted more than 1,000 views through a live broadcast on the Journalism Colloquium YouTube platform.

The biennial colloquium brought together media practitioners and investigative journalists from Malaysia and Indonesia to discuss the challenges, opportunities, and implications of AI usage in today’s journalism industry.

Among the panelists involved were Malaysiakini investigative journalist S. Vinothaa; Deputy Group Managing Editor of Media Prima Berhad and Adjunct Professor at FCMS UiTM, Farrah Naz Karim; and CNN Indonesia Chief International Correspondent, Rully Kurniawan. The forum session was moderated by The Malaysian Reserve (TMR) journalist, Shahrin Aizat.

Throughout the session, the panelists stressed that AI should be viewed as a supporting tool in journalism processes rather than a replacement for human journalists.

According to Rully Kurniawan, the technology is capable of improving work efficiency, particularly in research and data analysis, but editorial decisions and fact verification still require human involvement.

“AI can help speed up research and data analysis processes, but journalists still need to go into the field for verification. AI only provides clues, not conclusions for a report,” he said.

Farrah Naz Karim said that modern newsrooms are increasingly utilising AI to improve the efficiency of producing multi-platform content.

However, she stressed that journalists should not become overly dependent on technology to the point of neglecting the fundamentals of journalism, such as fact-checking and the courage to ask critical questions.

“We cannot allow AI to write entire investigative stories. Journalists need to return to the basics and asking difficult questions, going into the field, and producing stories with humanity and soul,” she said.

Meanwhile, S. Vinothaa emphasised that investigative journalism still requires human instincts, field observation, and the ability to understand social realities that AI cannot replace.

She said journalists must go to actual locations because many important details are not available online.

“AI certainly helps in research and data analysis, but it cannot read human emotions, understand body language, or build trust with sources. That is the true strength of journalists,” she said.

Project Director, Nik Nur Iman Wahyu said the colloquium successfully created a platform for critical discussions on the future of digital journalism while exposing students to the real challenges and realities of today’s media industry.

“This colloquium has opened up critical discussions about the future of digital journalism and exposed future journalism graduates to the realities of the media industry,” she said.

She also noted that the online platform enabled the programme to reach a wider audience, including members of the public as well as media and journalism students from various institutions locally and internationally.

“Organising the programme online has allowed the discussion to be more accessible to the public, especially media and journalism students, without location limitations,” she said.

Besides discussing the use of AI in newsrooms, the forum also touched on issues related to deepfakes, synthetic content, data security, and the need to establish ethical guidelines for AI usage in the media industry.

FACT SHEET

ABOUT Journalism e-Colloquium

Journalism e-Colloquium is a continuation of the Final Year Project initiative by journalism students from the Faculty of Communication and Media Studies (FCMS), UiTM Shah Alam. This platform reflects the university's commitment to strengthening journalism education by emphasizing real-world exposure to the media industry.

The 53rd edition of the Journalism e-Colloquium explores the intersection of cutting-edge technology and high-stakes reporting. By examining the evolving role of investigative journalism in Malaysia, this session addresses how AI and immersive reporting are redefining media accountability and the safety of journalists in the digital age.

Main Objectives

- **Analyze the Impact of AI:** Evaluate the risks and opportunities presented by AI in the context of investigative reporting and media ethics.
- **Enhance Professional Competency:** Strengthen students' understanding of emerging challenges in the media industry through direct engagement with seasoned practitioners.
- **Bridge Academia and Industry:** Provide a platform for UiTM students, local university peers, and the public to network with international and local media experts.
- **Foster Global Perspectives:** Facilitate a cross-border exchange of ideas regarding the future of accountability and immersive storytelling.

Colloquium Sessions

- **Session 1**

Moderator: Shahrin Aizat, Journalist, The Malaysian Reserve (TMR)
Panelists: S. Vinothaa, Investigative Journalist, Malaysiakini

- **Session 2**

Moderator: Shahrin Aizat, Journalist, The Malaysian Reserve (TMR)
Panelists: Farrah Naz Karim, Deputy Group Managing Editor of Media Prima Berhad and Adjunct Professor at FCMS UiTM, Media Prima Berhad

- **Session 3**

Moderator: Shahrin Aizat, Journalist, The Malaysian Reserve (TMR)
Panelists: Rully Kurniawan, Chief International Correspondent, CNN Indonesia

Industry Collaboration & Support

UiTM Rembau & UiTM Alor Gajah: Supports participation from Communication and Media students and fosters inter-campus academic collaboration.

Budi Luhur TV: Provides media support to promote academic initiatives and strengthen synergistic partnerships between the university and the industry.
